EXPERIENCE

Lead Sales and Designer, Navier — July 2014 - Present

Sales • Frontend development • Vector graphics

Co-founded a consulting company focused on building technology tools for enterprise businesses.

- Responsible for all aspects of the sales pipeline from generating leads, following up with opportunities, and closing deals
- Create user interfaces for web and native apps

Frontend Developer, EMP — August 2014 - October 2014

AngularJS • UI/UX • Single page application

Designed and coded an email-like interface for a consulting client's encrypted messaging protocol.

- Developed single page application interface with AngularJS and IE8+ compliant code

Frontend Designer, Anvil — May 2014 - July 2014

Landing Page creation • Docker • Marketing

With a team of four developers, created a platform to easily host multiple code branches of a web app with just one click.

- Created landing page and outlined core user experience
- Did customer development research, processed feedback, and promoted the platform through Twitter

Co-founder, EleMENT — June 2013 - May 2014

Lean startup • Curriculum development • Startup network

Created an educational experience for high school sophomores to learn about lean startup principles.

- Organized logistics and meetings between students and tech startup mentors

PROJECTS

SignLang

AngularJS • Web sockets • NodeJS • Machine learning

- Created sign language interpreter using Leap Motion and MYO devices

Navier Landing Page

Flat design • CSS • SVG

- Consulting site design concept using flat design and detailed SVG artwork
